

Fund Description & Key Information

Over the long-term the sub-fund seeks to achieve the best possible risk-adjusted return by investing at least 51% of the net asset value in bonds and currency exposure with risks from Emerging and Frontier Markets. The investment strategy has a long-term investment horizon and employs a bottom-up, ESG-integrated country-selection investment process (Aktia Traffic Light Approach), utilizing Aktia's in-house Fundamental Model. We combine both quantitative and qualitative analysis and put more weight on the direction of

development than the current level. Investments are only made in local currency frontier market government bonds and money market instruments, currency derivatives and AAA-rated development finance institution bonds in frontier currencies. Derivative instruments are mainly used for investment purposes to take active currency risk but may also be used for hedging purposes. The strategy targets higher risk adjusted total returns with lower FX volatility, through diversification and off benchmark exposures.
